The 1st Reading

What I did this time.

- I read the text quickly, multiple times. Thinking about significant structures and placement.
- I researched Elizabethan conventions organically throughout the design process, as I needed them.

What I'll do next time.

The Convention-Connection (Before the first read)

- Reset your imagination, and acknowledge the chemistry of a particular style, before you read the script.
- What Elizabethan conventions (staging, props, movement) have helped spark your imagination?
- Read just for story to start.

How do these images function?

What questions are they answering?

Do some images fall in more than one function?

Questions to direct R&J research and concept building

- What do you want the audience to walk away thinking about?
- Do you want to distinguish the Montagues and Capulets? Why? How?
- Discuss critical symbols? Which are in the script? Which ones are production imposed?
- If you are using a time and place metaphor, what theme is in bringing to the surface?
- Brainstorm

Read again for
Movement—

In R&J the movement
defines the negative
space, which, in turn,
defines the structure.

Next time: Follow each
scene with a simple list of
hand props

- **1.1 (public square)**
- **Summary:**
 - Gregory and Sampson discuss the feud in the streets (m)
 - Abram and servant enter (Capulet)
 - They discuss thumb biting
 - Benvolio enters (Montague)
 - Gregory and Abram fight
 - Benvolio tries to break it up.
 - Tybalt enters
 - Benvolio and Tybalt fight
 - Citizens 3 or 4 enter with weapons (clubs or partisans)
 - L and LD Capulet enter
 - L and LD Montague enter (with sword)
 - Prince E enters with (escort)
 - Everyone exits
 - Montague L Montague and Benvolio remain
 - They discuss Romeo's early morning walks and sadness
 - Romeo Enters
 - Lord and Lady M leave
 - Benvolio and Romeo discuss the fight and love and Rosalyn
 - They exit

Opens March 2023

A Focused Juggle

Accelerated Script work for a new play

- **First Read for Plot and Characters**
- Highlight with color codes, make graphic notes for key symbols.
 - Transitions/movement
 - Large scenic pieces
 - *Props

Oh. That's right they hate me!

[Murphy laughs, and laughs until she's crying.]

Thank you. You've been a terrible audience. I'm out of here.

stand up Ends

[Murphy exits.]

ACT I

Scene 7

[Stars glitter and twinkle around. This is the vastness of space. We are on the moon. Not our moon, but a moon of some kind. A cardboard spaceship launches to the moon's surface. The door unlocks. Riley, Sophie, and Gia enter wearing space sci-fi outfits.]

Moon

Moon

RILEY

I'm going to kill Murphy.

SOPHIE

She's hurt.

Red, Pink, Orange, Purple

[An audience member can pick between four different colors: Red, Pink, Orange, and Purple. This color will determine the ending they are about to receive. Completely random. If an audience is unsure about picking, force them to pick by saying, "This is real. You must pick." Whatever color they pick, Murphy counts out the letters that spell that color on her paper chatterbox.]

Here we go.

[Beat. Static. Blackout.]

PURPLE: Meet Murphy's Pretenders

[The lights turn on. We are back in the boarding school attic where four young girls sit in a circle beside a familiar chest. They open their eyes as if they've been pretending. It's our girls: Murphy, Gia, Sophie, and Riley.]

Ending 1

RILEY

That majorly sucked, Murphy.

MURPHY

You all wanted to know what we'd be like ten years from now and I can't help that you didn't like it.

GIA

It wasn't all that bad. I sound hot at least.

RILEY

(mutters)

Convention Connection

Discussion with the playwright Pearl Moore

As far as convention I'm dipping into with Murphy's Law, I wouldn't say it's magical realism, but it has elements of that.

I definitely was influenced by many magical realism plays. To me the play is diving into childlike whimsy that is still somehow grounded with realism. Storytelling that packs a punch. Something that is symbolic but also transformative. I hope that helps!

-Pearl

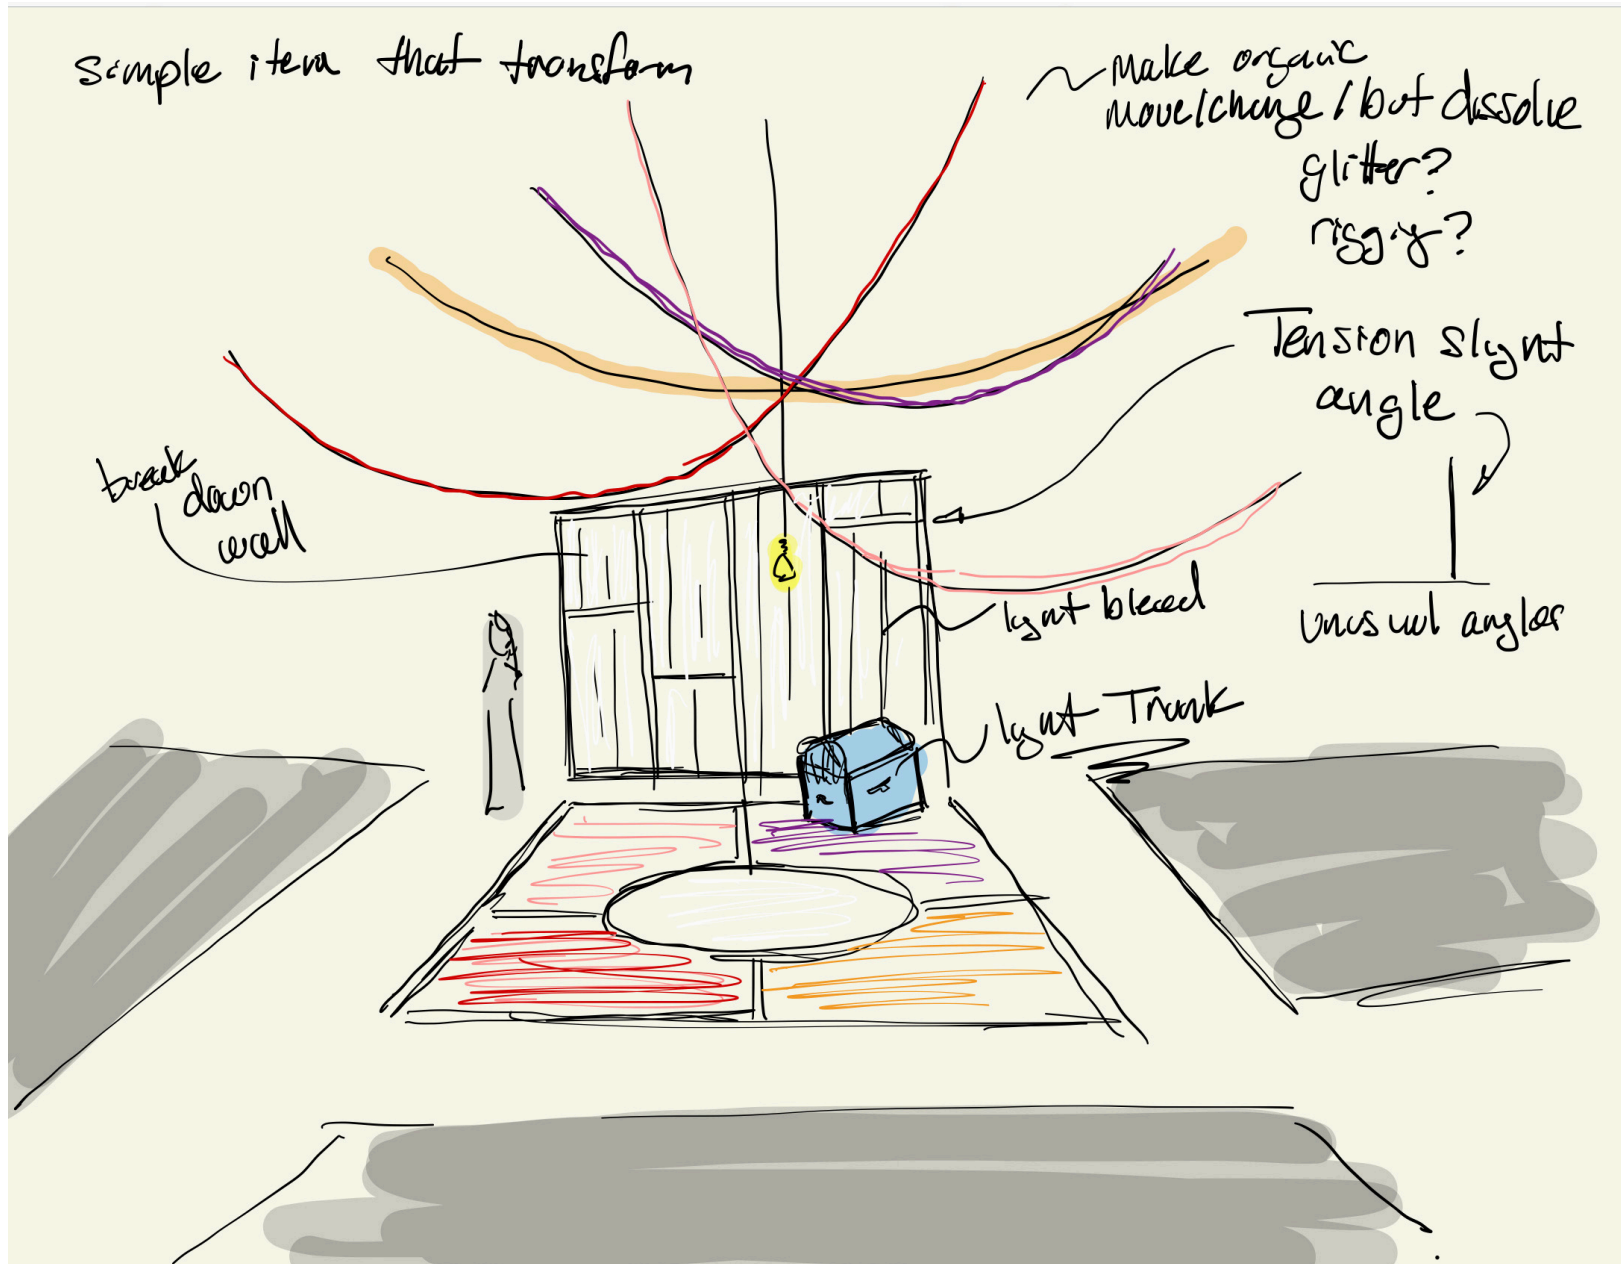

Image Association: Searching for the right visual ingredients.

Verbalize or write down the problem you are solving in your search.

Problem to solve: One structure holding two places. Attic and inside of a trunk.

Grounded Thumbnail: A thumbnail sketch that's fast, symbolic, to open the door to conversation, but proportional and functional to the venue you are working in.

Director Feedback:

Like: organic elements, trunk as game piece, connection to chatterbox.

Light bulb convention is a go.

Requests: More dramatic tension in the back wall, not white, wood color

A model or rendering is a tool that unifies the production elements and invites exploration from your collaborators.

Finalization

- Discern, then create the final communication tools for the shop and the rehearsal.
- For Rehearsal: Think about the learning styles of your director and actors. And practical things like shipping, with models.
- For the Shop: Think about their stock. Ask about preferred methods. Keep Vectorworks drawings tidy. Win, the shape overlap war.

Adjustment and Finalization—Choose a format that helps your organization move quickly.
